PROFESSIONAL SUMMARY

Systems and Computer Engineer with comprehensive experience in full-stack software development, IT infrastructure management, and specialized technical support. Proficient in creating web and mobile solutions using modern technologies (Next.js, Nest.js, Flutter), managing relational databases, and deploying applications in the cloud with Docker and DigitalOcean. Currently working as a Systems Engineering Assistant in the microfinance sector, where I combine technical skills in data analysis with Power BI, mobile application programming, and operating system administration, ensuring operational continuity and optimizing technological processes. Additional experience in the installation and configuration of fiber optic networks and telecommunications systems. Results-oriented with strong analytical skills, efficient resolution of complex problems, and excellent customer service. Proactive in implementing technological improvements, with a focus on innovation, cybersecurity, and collaborative work in dynamic and challenging environments. Committed to continuous learning and staying up-to-date on emerging technologies.

WORK HISTORY

Full-Stack Developer, 02/2025 - 07/2026

Microfinanzas Avante - Huancayo, JUNIN

- Development of web and mobile applications for the financial sector, including the implementation of a fintech solution for managing virtual loans, optimizing origination, monitoring, and collection processes.
- Building interactive dashboards and reports in Power BI for analyzing key performance indicators (KPIs), supporting data-driven decision-making.
- Extracting, processing, and analyzing data using SQL queries, generating strategic reports on customer behavior, portfolio performance, and the effectiveness of collection processes.
- Collaborating with business areas to translate operational needs into technological solutions, improving efficiency in financial management.

Systems Engineer, 04/2024 - 01/2025

Grupo P.A.M.D - Huancayo, JUNIN

- Management and support of IT infrastructure for companies in the retail (Promart, Oechsle) and financial (Caja Los Andes) sectors, ensuring the operational continuity of critical systems.
- Diagnosis and resolution of technical incidents in distributed environments, reducing downtime and improving service stability.
- Installation, configuration, and maintenance of software and hardware across multiple locations, guaranteeing performance and security standards.
- Optimization of technological environments through configuration and process improvements, increasing the operational efficiency of systems.

Professional Intern - Operations Area, 01/2024 - 04/2024

COSEGE - Huancayo, JUNIN

- Management and updating of operational procedures for the area, ensuring their correct execution and standardization.
- Attending to and following up on requests from internal and external clients, guaranteeing appropriate response times and quality service.

- Support in the implementation of projects and activities for the area, contributing to the achievement of operational objectives.
- Participation in continuous improvement initiatives, optimizing processes and proposing solutions aimed at operational efficiency.

Telecommunications Technician, 07/2023 - 12/2023

Cable Fast - PALIAN, JUNIN

- Implementation and maintenance of fiber optic networks, including installation, splicing, and connectivity testing, ensuring quality and stability in telecommunications services.
- Configuration of network equipment and DVR systems for signal distribution, guaranteeing continuous and reliable service for end users.
- Diagnosis and resolution of connectivity incidents in the field, reducing response times and improving service availability.
- Hands-on experience in infrastructure and networking, strengthening a comprehensive understanding of technological systems from the physical layer to their operation.

_____ **TRAINING** _____

Professional Title in Law: Systems and Computer Engineering, 01/2026

Universidad Continental - Huancayo, JUN

Bachelor of Science: Systems and Computer Engineering, 01/2017 - 01/2024

Universidad Continental - Huancayo, JUN

High School Diploma: completed my secondary studies., 03/2010 - 12/2015

Santa Isabel - Huancayo, JUN

_____ **SKILLS** _____

- | | |
|--|--|
| <ul style="list-style-type: none">• Backend & APIs: Node.js (Nest.js), JavaScript, TypeScript, REST API development, Swagger/OpenAPI• Databases: PostgreSQL, MySQL, SQL (queries, data modeling and analysis).• Frontend (additional): React, Next.js, HTML, CSS.• DevOps & Infrastructure: Docker, DigitalOcean deployment, Linux, basic CI/CD A2. | <ul style="list-style-type: none">• Data Analysis: Power BI, Excel (data analysis and visualization).• Version Control: Git, GitHub.• Additional Fundamentals: Java (basic-intermediate), testing knowledge and development best practices.• Infrastructure & Support (additional): Networking, telecommunications, troubleshooting, incident management. |
|--|--|

_____ **LANGUAGES** _____

inglés	B1	español	C2
Intermedio		Nativo	

_____ **CERTIFICATIONS** _____

- Python for Data Science Course - Platzi (Nov 2024)
- Professional Git and GitHub Course - Platzi (Dec 2024)

_____ **ACHIEVEMENTS** _____

- Third place in the XVII Engineering Projects Fair (2024), Article category, through the development of a mobile application focused on optimizing the use of drinking water, applying emerging technologies for the efficient management of resources.
